

NUTRITIONS

Healthy Fields ~ Optimum Yields!

Call 1-800-635-4743 • Seneca, KS • www.SureCropFertilizers.com

Quality Premium Starters

Start 7-25-2
8-27-3
4-16-5

- Balanced ratio of nutrients for optimum growth.
- Homogenized, low salt formulations.
- Readily available plant nutrition for placement near seeds.

Start 5-20-5

- Purest of liquid ortho Phosphate plant nutrition.
- Free of toxic carriers reducing plant tissue damage.
- Gives rapid response when foliar or soil applied.

Start Fish 2-5-0

- Provides slow release of natural Nitrogen, amino acid source.
- Natural organic Nitrogen and Phosphorus, easily assimilated by crops.
- Natural enzymes and hormones help proliferate soil life.

Potassium - Nitrogen - Sulfur

Power NK+ 2-0-20-6S

- Cost efficient, unique formulation of Nitrogen and chlorine-free Potassium.
- Activates plants' enzymatic systems, enhances chlorophyll production.
- Increases crops' water uptake efficiency, standability and test weight.

Grow-N 28-0-0-2S

- Stabilized, multi-forms of Nitrogen for greater crop uptake.
- Essential for chlorophyll synthesis with 2% Sulfur added for greater crop uptake.
- More Nitrogen utilized by growing crops and less lost to the environment.

Grow-N/S 9-0-0-20S

- Provide Sulfur to enhance Nitrogen uptake and conversion to plant proteins.
- Essential for photosynthesis and chlorophyll formation.
- Promotes nodulation in legume crops.

Foliars

Grow Vigor 7-0-0-7Ca

- Easily assimilated foliar Calcium for early plant stamina and vigor.
- Helps protect crops from disease and population loss.
- Increases root mass and nutrient transportation into the crop.

Assurance 7-10-3-2S

- Balanced foliar nutrition, apply at R1, enhance seed quantity and quality.
- Helps crops withstand and recover from plant stressors.
- Helps assure overall effectiveness of crop protection sprays.

Optimum N+ 19-0-0-1S

- Provide easily assimilated Nitrogen when crops needs are the greatest.
- Formulated with Sulfur to aid photosynthesis and Nitrogen absorption.
- Low salt index, compatible with most crop protections sprays.

Optimum K+ 3-0-13

- Provides unique Potassium foliarly when crops' needs are the greatest.
- Increases seed size, test weight and crop yields.
- Clean, near neutral pH Potassium solution, enhances plant receptivity use.

May be foliated

OMRI organic certified

Bio-Stimulants

Z/Micro

- Concentrated, fermentation nutrients to stimulate crop response.
- Helps activate beneficial soil microorganisms.
- Improves soil health, enhances crop yields.

Energizer 3-6-3-1Zn

- Stimulates earlier, more uniform seed germination.
- Increases emerging crop vigor and growth.
- Provides a nutrient rich, energized seed environment.

Crop Micro

- Provides small amounts of all elements necessary for crops.
- Increases plant vigor, germination and pollination.
- Helps crops withstand weather and insect stress.

Humate

Liquid, Powder & Granule

- Concentrated humic acids formulation with high cation exchange capacity.
- Forms bonds with fertilizers, prevents "tie-up" by soil ions.
- Improves soil tilth, aeration and moisture retention.

Activate

- Concentrated fulvic acids that easily permeates plant cell membranes.
- Complexes and transports insoluble elements into plants.
- Balances and energizes plant cells and microbes.

Micro-Nutrients

Micro-Pak

2.0%Zn, 1.5%Mn, 0.5%Fe, 0.5%Cu & 0.5% B

- Synergistic blend of Zinc, Manganese, Iron, Copper and Boron.
- Chelated micronutrients, blends well with most other liquid fertilizers.
- As essential for crop yield as Nitrogen, Phosphorus and Potassium.

Micro-Nutrients

Zinc, Manganese, Iron, Copper & Boron

- Specially chelated for rapid assimilation by plants.
- As essential for plant growth as Nitrogen, Phosphorus and Potassium.
- Compatible with most liquid fertilizers and crop protection sprays.

Secondary Elements

Calcium, Magnesium & Sulfur

- Specially formulated for rapid assimilation by plants.
- As essential for plant growth as Nitrogen, Phosphorus and Potassium.
- Provides balanced crop nutrition for optimum crop response.

Specialties

Plen-T Calcium

- Provides readily available calcium to crops foliarly or soil applied.
- Apply with Nitrogen; for greater Nitrogen uptake and utilization.
- Boosts nutrient uptake and enhances crop vigor.

Plen-T Sweet

- Provides readily available Carbon for microbial activity.
- Stimulates soil microbes to solubilize nutrients in the soil.
- Speeds the release of elements in the soil.

Plen-T Phos

- Enhances availability of soluble nutrient for crop uptake.
- Provides greater phosphorus utilization.
- Helps improve crop performance and yields.

N-Stay 7-0-0-9S

- Uniquely blended propriety formulation of Sulfur and micronutrients.
- Facilitates greater Nitrogen uptake, less lost to the environment.
- Economically and efficiently increases crops' yield.

Complete 4-0-0-6S

- Accelerates residue breakdown and nutrient recycling.
- Improves soil structure, increases soil carbon and organic matter.
- Helps reduce soil erosion; decreases soil compaction.

Power Pak

- Absorption activator, use in place of AMS.
- Defoamer, drift retardant and anti-evaporant.
- Provide wash off protection in the event of rain.
