

COUNTRY[®]
MANOR
PRODUCTS

Fine décor for your
LAWN & FLOWER
GARDEN.

Old-Fashioned Gazebo

*Freedom from
traditional maintenance.*

A perfect place to show and enjoy your flowers.
PVC construction means you'll never have to scrape or paint again. Posts permit 3' buried depth. May be set in concrete base because PVC will never rot or split.

Available in 7' and 10' diameter models

72" Tall Rose Trellis

Free from traditional maintenance, this PVC trellis makes sure climbing vines and plants will never have to be removed for painting ... because it never needs it. Arrives partially assembled ... installs in minutes. (Mounting post not included.)

Long-Life Compost Bin

You will never have to replace another compost bin again once you buy the heavily constructed Country Manor® composter. It's the perfect way to make compost because our bin never rots or peels. Angled slats remove easily to rotate or remove compost. Why didn't someone think of this before?

Durable Picnic Table

We've combined heavy-duty, virgin PVC planks with a tubular aluminum framework for a picnic table that wipes clean, never gets splinters or needs painting. It can be slid across your yard — light in weight, heavy-duty construction. The seats are never hot because the PVC reflects the sun's rays.

Your Choice Glider or Swing

Glider

Powder Coated Steel Framework on both products.

Swing

The standard 48" PVC seat is always cool to the touch and seats two comfortably. Convenient arm-tables hold your iced tea (glider only). Available in white only.

Long-Life Park Bench

Country Manor®'s heavy duty, virgin vinyl planks with a tubular aluminum framework means long usable life. No painting. No splinters. Always cool to the touch and they work great in high moisture areas such as around pools, sauna rooms, public shower rooms, decks and car washes.
